

“See”G3 Windows™-Based Download and Graphics Utility For the CG3-Autograv Gravimeter

- Quick and easy to learn.
- Windows™ serial toolbox replaces DOS-based iDump.
- Supports upload of CG3-Autograv format data for quality control of archived data.
- Sorting tool allows viewing of data by station, header or time.
- Raw data view allows quick editing of field gravity data.
- Graphics object provides visual quality control capabilities.
- Basic statistical information for easy line and station integrity checking.
- Runs on all Windows™ platforms.

Automated download tool provides easy accessibility to both raw CG3-Autograv instrument data and archived CG3-Autograv format data files. Data viewer allows single and multipoint selection and sorting.

Graphics tools provides direct information regarding meter performance and misclosure, including visual correlation and trend analysis. The orange circle highlights drift in gravity (red) changing with temperature (green).
