

February 2010

Micro-g LaCoste Absolute Gravimeter Workshop
20-24 September, 2010

Micro-g LaCoste is pleased to announce another Absolute Gravimeter Workshop to be held in Lafayette, Colorado, USA the week of 20-24 September, 2010! As before, the discussion will focus on "advanced" topics related to Micro-g LaCoste absolute gravity meter hardware and software, and is aimed primarily at groups and individuals already familiar with absolute gravity meters. Topics will include (but are not limited to):

- Absolute gravity measurement theory
- Software - processing data with "g" software
- Software - Environmental correction issues
- Software - Data signatures of common problems
- Hardware - Interferometer alignment
- Hardware - Laser cleaning
- Hardware - Fiber optics alignment
- Hardware - Dropper tuning
- Hardware - Dropping chamber belt replacement
- Hardware - Superspring alignment
- Hardware - Superspring tuning

"Classroom" training will take place at the Micro-g LaCoste facility in Lafayette, Colorado (near Boulder and Denver). Attendees will also work in small groups, receiving hands-on training with an FG5, A-10, or FGL gravity meter. Previous workshop attendees will note that the hands-on portion of the workshop will be very similar to earlier workshops.

In addition to the "classroom" discussions, we would like to schedule a series of (optional) 15-20 minute presentations by workshop participants. More details on this as attendee interest is gauged.

The course is contingent on an enrollment of at least 7 persons and limited to a maximum of 15 persons. The cost is US\$1800 per person, and includes all course materials, box lunches, and snacks (the fee does not include airfare, lodging, or additional meal expenses). Also included are an "ice-breaker" dinner and a visit to nearby Rocky Mountain National Park.
